

**LOCATING A LAB**  
**to collect a specimen for**  
**the Autoimmune Brain Panel™**  
*(formerly known as the Cunningham Panel™)*

## Suggestions/resources to help you locate a laboratory for the blood collection.

Please read the information below before attempting to obtain a specimen for the Autoimmune Brain Panel *(formerly known as the Cunningham Panel™)*.

Some labs require an appointment and/or may be unable to do the blood draw for this panel.

**To avoid disappointment and frustration, the most important point is to CALL THE LAB FIRST!**

**1. Does the patient have other blood tests to be drawn in addition to the Autoimmune Brain Panel™?**

If yes, please call your 'usual' laboratory. If there are other tests that will be performed by that lab, they may be able to draw the Autoimmune Brain Panel™ for you at the same time.

**2. If your usual lab is unable to perform the specimen collection, we suggest that you contact:**

- Your family doctor's office or clinic
- Your local hospital outpatient laboratory
- An urgent care clinic
- A small local clinical laboratory (Perform an internet search for "clinical laboratories" in your city or county)
- A company that specializes in providing blood draw services, such as Any Lab Test Now® ([www.anylabtestnow.com](http://www.anylabtestnow.com)) or ARCPoint Labs ([www.arcpointlabs.com](http://www.arcpointlabs.com))
- A mobile phlebotomy service in your area
- A home healthcare company in your area

**3. When you call, use the following wording to ask your question:**

***"Will you perform a kit draw for a specialty test?"*** Many labs will not be familiar with the Autoimmune Brain Panel™ *(formerly known as the Cunningham Panel™)*.

**4. If you are unable to locate a laboratory to provide specimen collection for you, please call Moleculara Customer Service at 405-239-5250.**

We can arrange a blood draw at Quest Diagnostics for you. We have negotiated a special rate of \$65 that must be paid to Moleculara in advance. (This is a separate charge and is not included in the cost of the Autoimmune Brain Panel™). Appointments are required and we must provide special paperwork to you that authorizes the blood draw.

**Helpful information regarding the blood draw:**

- It is a standard blood draw.
- No fasting required!
- The specimen collection supplies contain all the necessary materials, including a pre-paid overnight return label.
- **VERY IMPORTANT:** It is critical that your specimen arrives at Moleculara on a **US Business Day** or your specimen could be rejected. Draw and ship specimens Monday – Thursday for **weekday delivery only** as transport kit will ship via FedEx Priority Overnight to arrive in our laboratory on the next **business day**. **DO NOT DRAW OR SHIP ON FRIDAY, SATURDAY, SUNDAY, OR THE DAY BEFORE A HOLIDAY.**
